

What are the Availability and Submissions options for an assessment?

In **Availability and Submissions**, you will find options including who should take the assessment, availability dates, and how many submissions are allowed. For more information on additional assessment settings, see [How do I view and modify the settings of an assessment?](#)

In the assessment Settings page, click Availability and Submissions.

Assessment Released To

Assessment released to

Entire Site

Anonymous Users

Entire Site

Selected Group(s)

By default, the assessment will be released to the **Entire Site**. Alternatively, you can choose to release the assessment to **Anonymous Users** or **Selected Group(s)** within your course.

The **Anonymous Users** option provides no information identifying who submitted the assessment associated with submissions. You can use this option to create anonymous surveys.

Choose one of these options from the drop-down menu. (You will only be able to choose specific groups if there are existing groups in your site.)

Notes:

- If you release an assessment to **Anonymous Users**, you must distribute its URL to participants; it will not be accessible from within your site's Tests & Quizzes tool. The URL will be presented when you publish the assessment.
- You cannot change the **Assessment Released To** option on any published assessment.

Number of Submissions Allowed

The number of submissions allowed

Unlimited
 Only submissions allowed

Enter the number of times students are allowed to submit the assessment, or choose **Unlimited** to let them submit as many times as they like.

Tip: Unlimited submissions are often used for self-assessment, practice tests, or drills.

Availability Dates

1 It is available

2 It is due and has a time limit of hrs. min.

Late submissions accepted?

Autosubmit

Question Scores

Time

Hour

Minute

The availability dates let you specify when your assessment can be accessed by students. By default, all the dates are **blank**.

Use the date-picker (calendar icon) to select a date and time.

1. The **available date** is the start date of the exam window. Students will not be able to see the assessment before this date. Publishing an assessment with a blank **available date** will make it available immediately upon publishing.
2. The **due date** is the end date for the exam window. Students will not be able to submit after this date unless you **accept late submissions**. If late submissions are allowed, any submissions after the due date will be marked as late.

*Note: When you click on any date field, the date-picker (calendar window) will display. You can choose a date by clicking on it in the calendar, or by clicking **Now**. Select a time using the **Hour** and **Minute** sliders. When your date is selected, click **Done**.*

Late submissions accepted?

Late submissions accepted?

No, not after due date

Yes, until 

Students get one chance to submit after due date if they haven't already submitted.

Under *Late submissions accepted?* you can accept late submissions by clicking the radio button to select **Yes, until**, and then by entering a late acceptance date in the adjacent date field. By default, late submissions ARE accepted. Use the date-picker (calendar icon) to select a date and time.

If you do allow late submissions, submissions that come in after the due date will be marked **LATE** in capitalized red letters after their Submit Date.

Note: Even if you allow multiple submissions, only one late submission is allowed after the due date, and it only applies to students who have not submitted at all.

Timed Assessment

It is due  and has a time limit of hrs. min.

If you would like your assessment to be timed, select the check box next to the text *has a time limit of* and select a **time limit** in **hours (hrs.)** and **minutes (min.)** from the respective drop-down menus.

Automatic Submission

Autosubmit

Autosubmit saved student work after latest acceptance date

Check the box to **Autosubmit saved student work after latest acceptance date** if you want assessments to be automatically submitted after the latest acceptance date.

The Autosubmit setting forces the submission of saved assessments belonging to students who have started the assessment, but did not successfully submit their work before the latest acceptance date. All work that a student had saved will be included in their automatic submission.

Note: The Autosubmit setting is only available if it has been enabled by your institution. By default, it is disabled.

Question Scores

Question Scores

Show question point value during assessment

Hide question point value during assessment

Choose the appropriate radio button to indicate whether or not you want to **Show question point value during the assessment** or **Hide question point value during assessment**. The default is to show the point value.

Exam Security by Location or Password (Optional)

▼ Ensure students take exams from specific location

1 Allow only specified IP Addresses

2 Assessment Password

Secondary Password

Use one IP address per line. An asterisk(*) can stand for any single subnet.
Examples: 171.64.139.* or 171.64.*.*

For high stakes testing, you may want to provide additional security for your assessment. Click on the **Ensure students take exams from specific location** link to expand that section and display the following options:

1. You may restrict the assessment so that only connections from certain IP addresses are allowed, such as a building on grounds. Enter one IP per line into the **Allow only specified IP Addresses** field. Asterisks may be used to stand for any single subnet.
2. You may also specify a *Secondary Password* for the assessment. This **Assessment Password** is typically provided by the instructor in the classroom or testing center, so that students must be present to enter the assessment.

Note: The Secondary Password is for this specific assessment, and NOT the instructor's or the student's login information.

Submission Message (Optional)

The screenshot shows a configuration interface for a submission message. At the top, there is a blue header with a dropdown arrow and the text "Add message that students will see after submission". Below this, the interface is divided into two sections. The first section, labeled "Submission Message" with a circled "1", contains a large text area with a red border. Above this text area is a yellow button labeled "Show Rich-Text Editor (and character count)". The second section, labeled "Final Page URL" with a circled "2", contains a long text input field with a red border. Below this field is a button labeled "Validate URL".

1. If you would like to enter a message that students see upon submitting their assessment, click on the **Add message that students will see after submission** link. The [Rich Text Editor](#) is available if desired.
2. You may include a **Final Page URL** if you'd like. The URL for this page will be displayed after the student submits the test.
