# How do I set my notification and other profile preferences?

On your preferences page, you can control what emails are sent you when various actions occur, choose what widgets are shown on your profile, manage your preference to an officially provided image (if configured), as well as manage the Twitter integration for your status updates. All changes in preferences are optional.
Note: Depending on institutional settings, some of these options may not be available in your local instance.

Go to Profile.

Select the **Profile** tool from the Tool Menu in your Home area.
