

How do I merge columns and sections to one block on a Lessons page?

Sections and columns can be merged in two different ways.

Go to Lessons.

☰ Overview

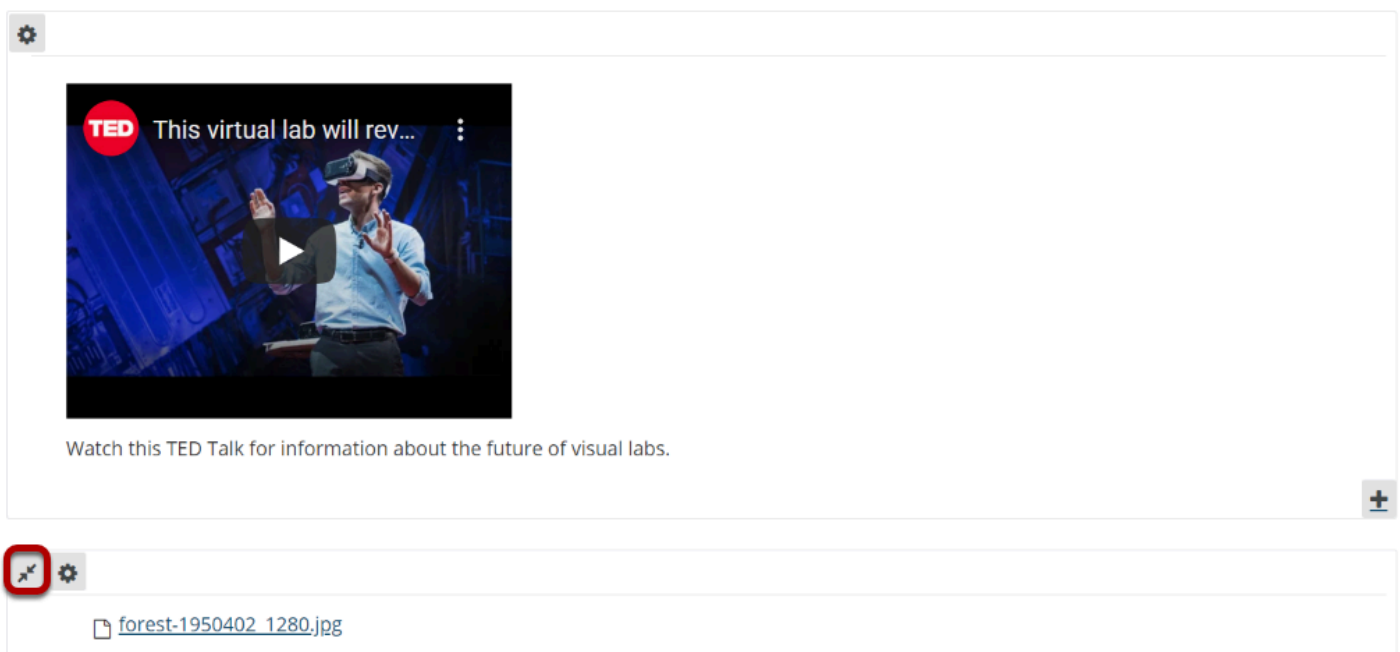

📄 Lessons

📅 Calendar

Click on the Lessons tool in the Tool Menu to display the page.

Note: The Lesson page must already contain content and one or more section breaks before you can combine sections.

Method 1: Click the Merge button.

The screenshot shows a lesson page interface. At the top left, there is a gear icon for settings. Below it is a video player with a play button and a red TED logo. The video title is "This virtual lab will rev...". Below the video, there is a caption: "Watch this TED Talk for information about the future of visual labs." At the bottom left, there is a red square button with a white merge icon (two arrows pointing towards each other) and a gear icon. Below this button, there is a file name: "forest-1950402_1280.jpg". At the bottom right, there is a plus sign icon.

The **Merge** button looks like two arrows pointing in toward each other. It is located in the top left corner of each content block (either section or column).

Clicking on the **Merge** button will merge the selected content block with the block above it.

Method 2: Click Reorder.

The two sections or columns will be merged to be one big block with borders around them. All items will be displayed in order vertically inside the content block borders.
