

How does anonymous posting work in Conversations?

When you select Create new topic to add a question to Conversations, there are two different Anonymous options available.

1. **Anonymous - Hide name on post:** Select this option if you would like your question topic to show **Anonymous** instead of the author's name.
2. **Anonymous Comments - Allow anonymous comments:** Select this option if you would like to allow users to post answers and replies/comments on answers within this question topic with **Anonymous** shown as the author.

Note: *The instructor or site owner will always see the name of the topic or post author, regardless of the anonymous setting.*
