

# What is the Conversations tool?

Conversations is a tool in Sakai that allows instructors and students to ask, answer, and respond to questions. Instructors can group Conversation topics by creating and applying tags. Instructors can share topics with specific Groups. Students can ask questions and add instructor-created tags; they can respond to questions and answers with both text and emojis. Important topics can be pinned. Tags can be used to sort topics and topics can also be searched.

**To access this tool, select Conversations from the Tool Menu of your site.**
